

**To:** City of Mauston – Common Council  
**From:** Nathan Thiel, City Administrator  
**Subject:** Comprehensive Plan Survey Results  
**Date:** September 19, 2016

Attached are the results from the community survey developed as a part of the Comprehensive Plan. We had over 250 participants. As part of the survey, there were nine open-ended questions for comment on subjects like Housing, Transportation, Facilities, etc. We received over 650 comments. Staff spent time categorizing each comment into 54 categories or groupings. Over 80% of the comments and recommendations could be paired or matched up into specific groupings. The remaining 88 comments were unique, or did not fit into a specific category, and were lumped into a generic “Misc.” description.

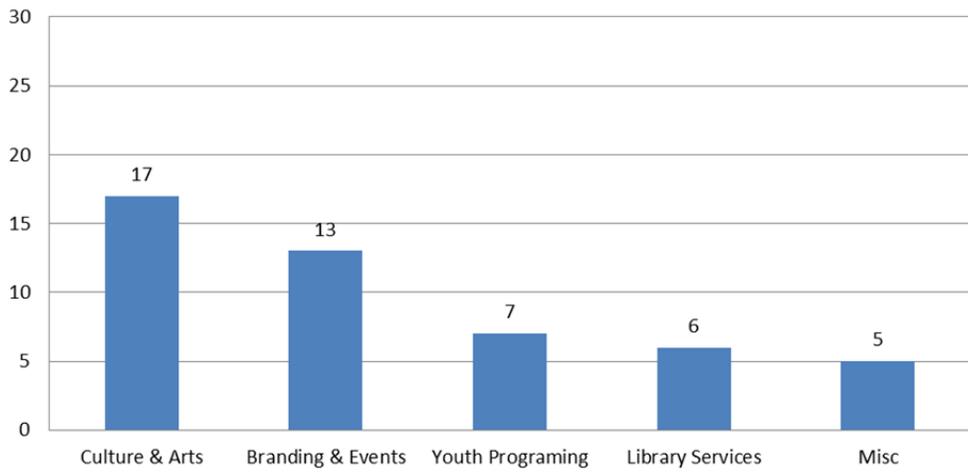

Please note some subjects had both comments in favor and opposed. If the comment was in favor, it qualified for a point. If the comment was opposed, it qualified for a negative point. The top popular subjects or groupings are shown in the chart below by the number of comments received. Each grouping expresses a need or desire for an increased focus or service improvement. The following pages show the groupings for each element surveyed.

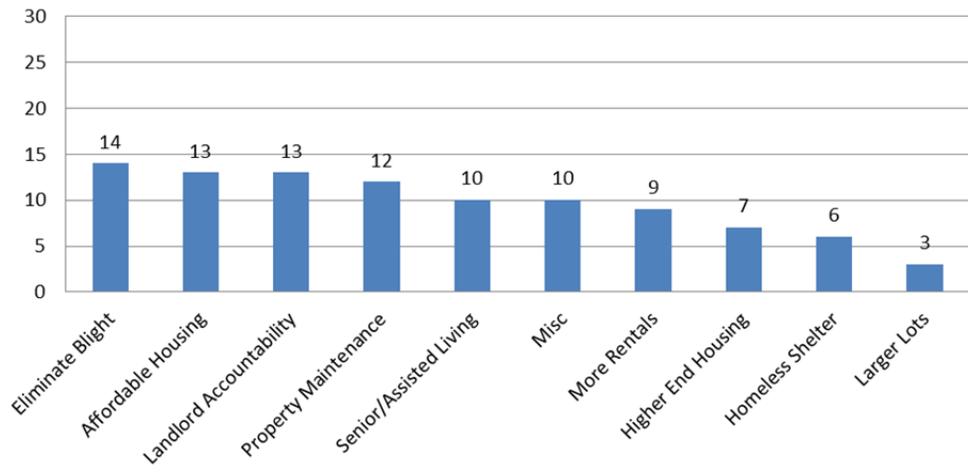

## Agricultural

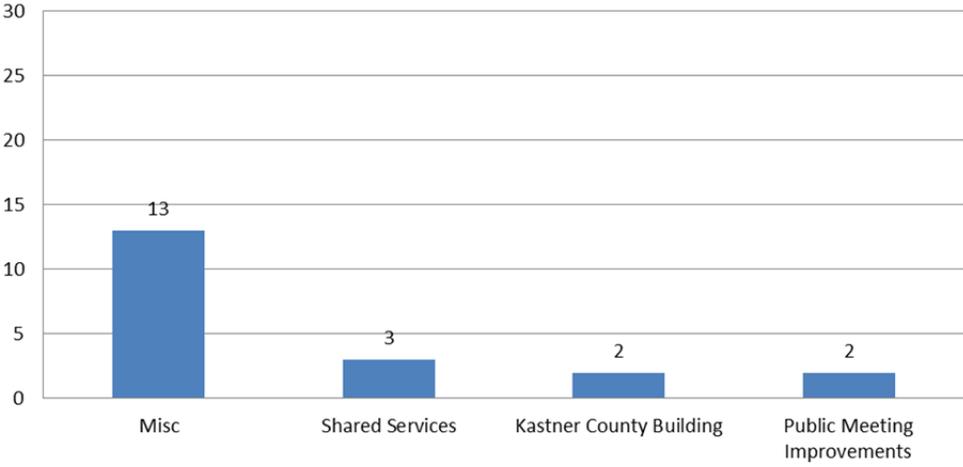

## Cultural

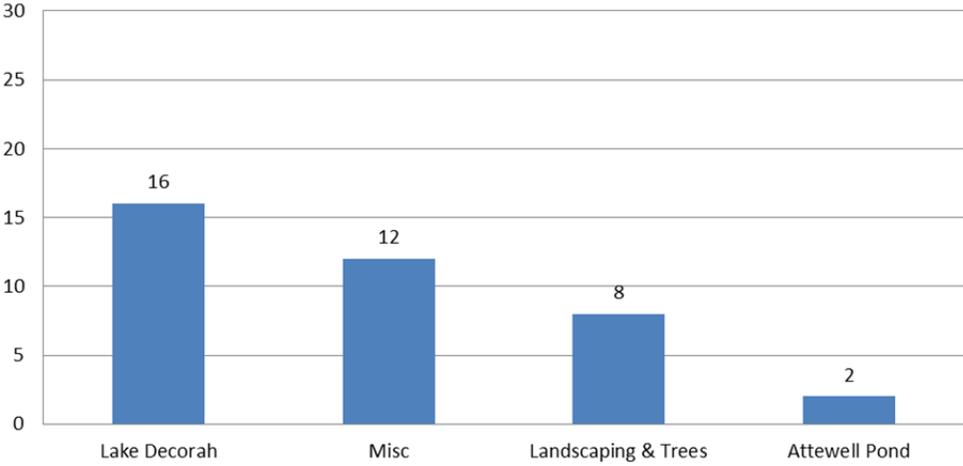

## Housing

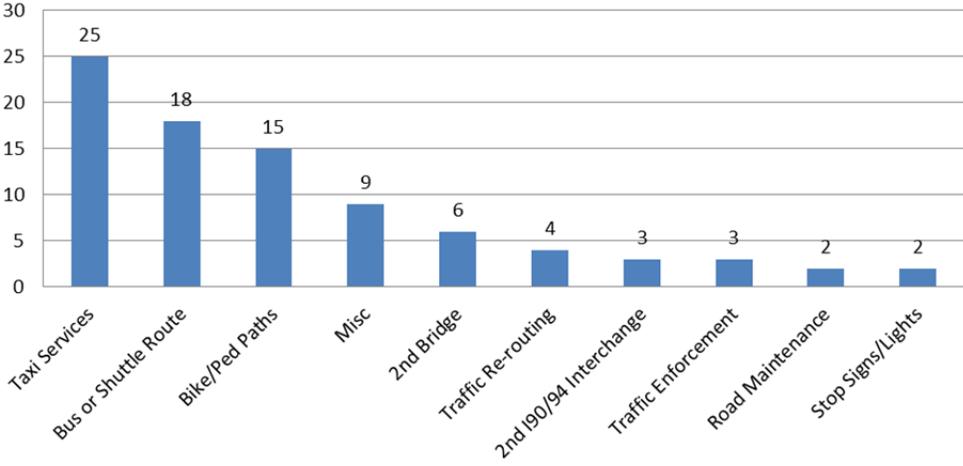

# Intergovernmental

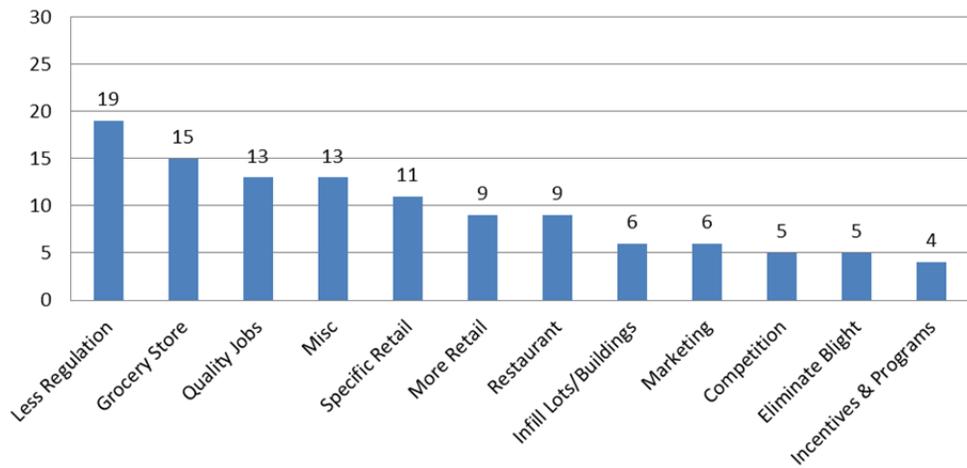

# Natural

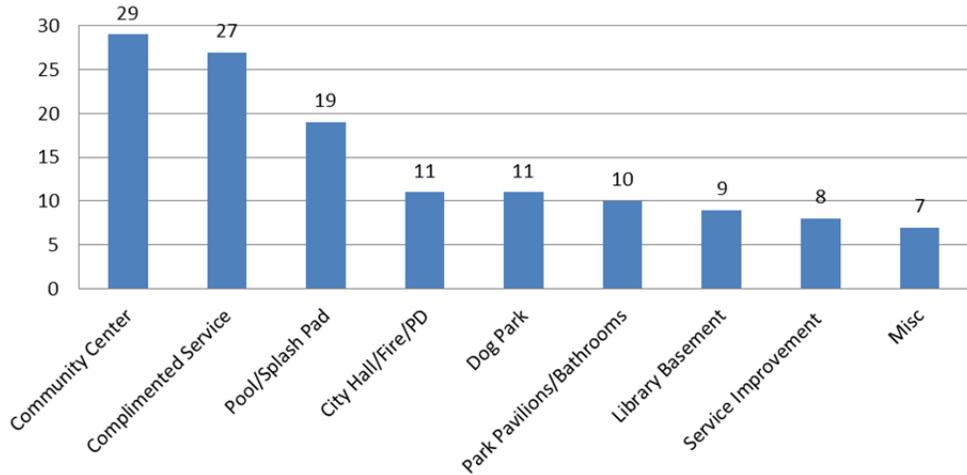

# Transportation

## Economic Dev & Land Use

## Facilities & Services

## Utilities
